The Right Hose with the Right Connections for the Right Job from the Right Source

MAY 2021
FEATURED PRODUCTS
SHOWCASE

Continental has been at the forefront of flexible hose technology, predominantly in the marine environment, for well over 60 years.

Marking: CONTINENTAL 3/4" I.D. 300 PSI W.P. NITROGEN SERVICE MADE IN USA

For in-plant nitrogen service at petrochemical, refineries, and general manufacturing. Design Factor: 4:1

Specifications

- Construction Tube: EPDM Synthetic Rubber
- Cover: EPDM Synthetic Rubber GREEN
- Reinforcement: 4 Spiral Polyester
- Temperature Range: -40°F to 210°F (-40°C to 99°C)

Preventive Maintenance:

A good hose inspection will always involve checking for leaks in the hose itself as well as at connectors and couplings. Leaks can often be identified by looking for puddles, dirty areas on the hoses or equipment, and low fluid levels.

Our knowledge and expertise allow us to deliver the most innovative and highest-quality products on the market. Plus, our extensive problem-solving experience across multiple industries and applications enables us to share innovations over our entire product offering. Which means we can deliver unexpected solutions and advanced improvements in situations where others can't.

Hoses are used in facilities to transport liquids, and plant utility application, such as, water, air , steam, nitrogen, hydrocarbon and gases from one place to another, both short and long distances. Most facilities have dozens of pipelines moving substances from place to place and because of this, it is important for the operator to keep track of the contents in each pipeline as well as its destination.

GREEN COLOUR HOSE COVER is use as a colour coded system for NITROGEN as it is extremely helpful to identify the right hose for the right applications and to prevent higher risk of causing an accident that may result in physical harm as well as facility damage.
